Tower Clock 1905
Milwaukee, Wi
3/12/2023

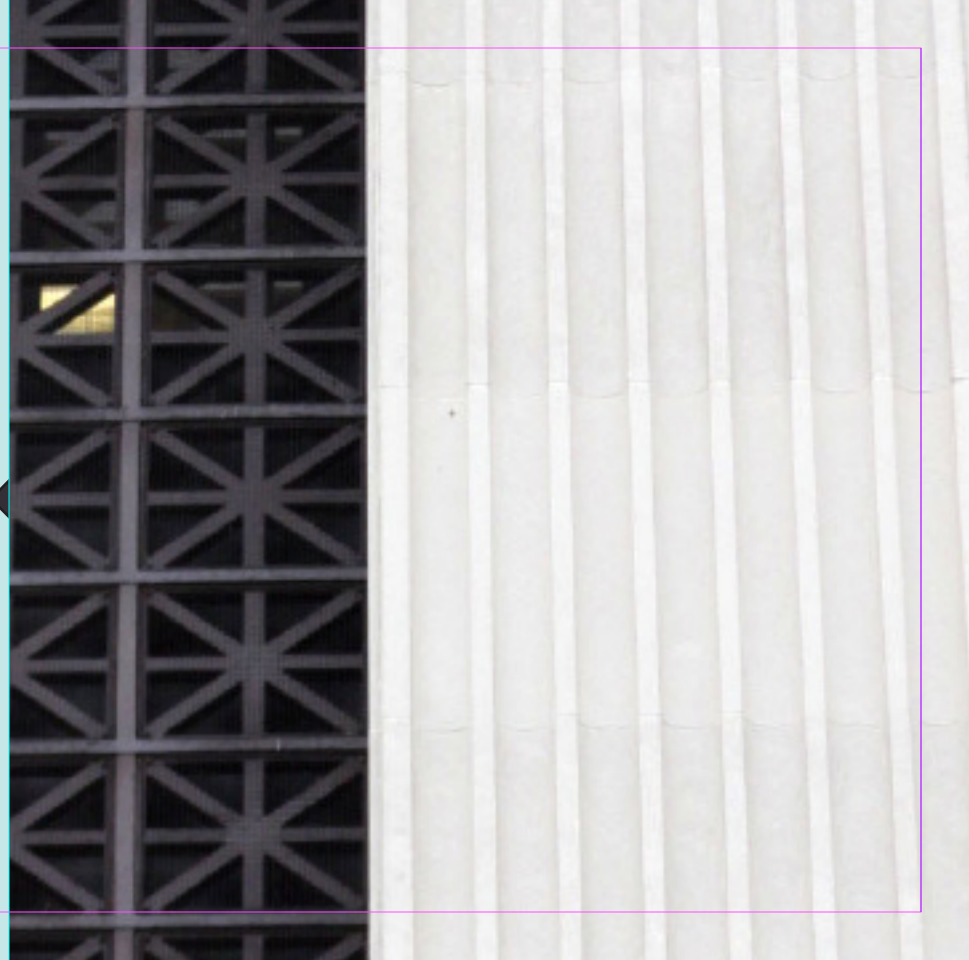

An abstract sculpture is positioned vertically in the center of the image, straddling the boundary between the white and tan backgrounds. It features a large, curved, gold-colored section at the top, a smaller red section below it, and a dark brown base. The sculpture's form is organic and flowing.

This booklet explores the relationship of Milwaukee architecture and infrastructure with typeface. Each page displays a letter paired with a individual font, creating 26 unique pairings and illustrating the influences of the world around us on typography. To create this booklet, I spent an afternoon walking around Milwaukee, paying special attention to the historic churches.
